How many energy projects are coming to Cambodia?

The Cambodian Cabinet approved four energy projects this past April, a US\$231 million hydroelectric power and three solar power projects with a combined, rated, maximum power capacity of 140 MW. The latter are expected to come online and dispatch power to the national grid by 2020 and 2021 in four different provinces.

Is solar energy a good investment in Cambodia?

Already, there is growing awareness about solar energy in Cambodia, providing an excellent investment opportunity--while also the cheapest way for Cambodia's EDC to buy electricity. Solar power purchase agreements in the region reached a low of USD 0.0387/kWh.

Can solar power help Cambodia achieve national electrification goals?

Searching for alternative options, Cambodia joins a growing list of national governments who have come around to seeing solar and other distributed, emissions-free renewable energy resources as a cost-effective means of achieving national electrification, as well as national and international climate change and renewable energy goals.

Can solar power change the lives of rural communities in Cambodia?

Solar power purchase agreements in the region reached a low of USD 0.0387/kWh. Finally, solar can also change the lives of rural communities by providing a reliable and sorely needed energy solution. Going forward, Cambodia has potential.

Will increasing solar power boost Cambodia's exports?

Aligned with achieving sustainable agriculture, energy and general improvement in livelihoods and living conditions, Cambodian Rice Federation (CRF) secretary-general Moul Sarith reportedly said that increasing solar power generation would help reduce electricity costs and boost the Kingdom's exports.

Should Cambodia invest 600 million in infrastructure upgrades?

According to the Asian Development Bank (ADB), the state-run Electricite du Cambodge (EDC) should have invested USD 600 million for infrastructure upgrades over the last five years, yet failed to do so. Cambodia also suffers from high and often very volatile power costs.

Samdech Moha Borvor Thipadei Hun Manet, Prime Minister of the Kingdom of Cambodia, welcomed the intention of Shenzhen Power Solution to invest in Cambodia, especially in the production of solar-powered appliances.

Cambodia is suited perfectly for solar power because you get so many peak sun hours. Located 1500 Km (900 mi) north of the equator means intense, high in the sky sunlight for almost 6 hours a day. A "peak sun hour" is defined as an hour ...
